FOREIGN POLITICAL RELATIONS

The United States has grown to be a government representing more than 50 000 000 people and in every sense excepting that of mere naval power is one of the first nations of the world As such citizenship should be valuable entitling its possessor to protection in every quarter of the globe I do not consider it necessary that our government should construct enormous fleets of improved ironclads and maintain a commensurate body of seamen in order to place ourselves on a war footing with the military and naval powers of Europe Such a course would not be compatible with the peaceful policy of our country though it seems absurd that we have not effective means to repel wanton invasion of our coast and give protection to our coast towns and cities against any power The great moral force of our country is so universally recognized as to render an appeal to arms by the United States either in protection of our citizens abroad or in recognition of any just international demands improbable What we most need in this direction is vigorous assertion of every right and privilege belonging to our government or its citizens as well as an equally firm assertion of the rights and privileges belonging to the general family of republics situate upon this continent. When opposed, if ever they should be by different systems of government upon another continent, an appeal to right by such a government as ours could not be disregarded by any civilized nation In the treaty of Washington we led the world to means of escape from the horrors of war and it is to be hoped that the era when all international differences shall be decided by peaceful arbitration is not far off

EQUAL RIGHTS TO CITIZENSHIP

Our forefathers in their attempt to erect a new government which might represent the advanced thought of the world at that period upon the subject of government reform adopted the idea of the people's sovereignty and thus laid the basis of our present republic While technically a government of the people it was in strictness only a government of a portion of the people excluding from all participation a certain other portion held in a condition of absolute despair and hopeless servitude a condition which fortunately does not now exist in any modern Christian nation With the culmination however of another cycle of advanced thought the American republic suddenly assumed the full character of a government of the whole people and four million human creatures emerged from the condition of bondsmen to the full status of free men theoretically invested with the civil and political rights possessed by their former masters The subsequent legislation which guaranteed by every legal title citizenship and full equality before the law in respect to the previously disfranchised people amply covers all requirements and creates to them so far as legislation can the privileges of American citizenship But a disagreeable fact in the case is that while theoretically we are in the enjoyment of a government of the whole people practically we are almost as far from it as we were in the antebellum days of the republic

THE SITUATION IN THE SOUTH

These are but a few of the leading and undisputable facts which cover the whole statement of the case In many southern states the colored population is in large excess of the white The colored people are republicans as are also a considerable portion of the white people The remaining portion of the latter are democrats In the face of this incontestable truth these states invariably return democratic majorities In other states of the south the colored people although not a majority form a very considerable body of the population and with white republicans are numerically in excess of the democrats yet precisely the same political result is obtained and the democratic party invariably carries the elections It is not even thought advisable to allow an occasional or unimportant election to be carried by the republicans as a blind or stroke of finesse Careful and impartial investigation shows that these results are obtained by intimidation and violence conjoined with the most shameful devices ever practiced in the name of free elections So confirmed has this result become that we are brought face to face with the extraordinary political fact that the democratic party of the south relies almost entirely upon the methods stated for success in national elections

A QUESTION OF DEEP GRAVITY

This unlawful perversion of the popular franchise which I desire to state dispassionately and in a manner comporting with the proper dignity the occasion demands is a question of deep gravity to the American people in a double sense First It is in violation open direct and flagrant of the primary principle upon which our government is supposed to rest viz that control of the government is participated in by all legally qualified citizens in accordance with popular government, and that majorities must rule the decision of all questions Second it is in violation of the rights and interests of states wherein are particularly centered the great wealth and industries of the nation and which pay an overwhelming portion of the national taxes The immense aggregation of interests embraced within and the enormous greater population of these other states of the Union are subjected every four years to the dangers of a wholly fraudulent show of numerical strength Under this system minorities actually attempt to direct the course of national affairs and though up to this time success has not attended their efforts to elect a president yet success has been so perilously imminent as to encourage a repetition of the effort at each quadrennial election and subject the interests of an overwhelming majority of our people north and south to hazards of illegal subversion

THE OLD ARGUMENT

The stereotyped argument in refutation of these plain truths is that if the republican element was really in the majority they could not be deprived of their rights and privileges by the minority but neither statistics of population nor logic of the situation can be overridden The colored people of the south have recently emerged from the bondage of their present political oppressors and they have had but few advantages of education which might enable them to compete with the whites As I have heretofore maintained in order to achieve ideal perfection of popular government it is absolutely necessary that the masses should be educated This proposition applies itself with full force to the colored people of the south They must have better educational advantages to thus be enabled to become the intelligent peers of their white brethren as many of them undoubtedly already are A liberal school system should be provided for the rising generation of the south and the colored people made as capable of exercising the duties of electors as the white people In the meantime it is the duty of the national government to take such action as may lie in its power to secure absolute freedom in national elections everywhere To that end our congress must cease to contain members representing fictitious majorities of their people thus misdirecting the popular will concerning national legislation and especially to the end that in presidential contests the great business and other interests of the country may not be placed in fear and trembling lest an unscrupulous minority should succeed in stifling the wishes of the majority In accordance with the spirit of the last republican platform measures should be taken at once to remedy this great evil

THE CIVIL SERVICE

The subject of civil service administration is a problem that has occupied the thought of statesmen for a number of years past and the record will show that toward its solution many results of a valuable and comprehensive character have been attained by the republican party since its accession to power In partisan warfare made upon the latter with a view of securing public confidence a great deal has been alleged in connection with abuse of the civil service the party making the indictment seeming to have entirely forgotten that it was under full sway of the democratic organization that the motto "To the victors belong the spoils" became a cardinal article in the democratic creed With a determination to elevate our governmental administration and standard of justice excellence and public morality the republican party has sedulously endeavored to lay the foundation of a system which shall reach the highest perfection under the plastic hand of time and accumulating experience The problem is one of far greater intricacy than appears upon its superficial consideration and embraces the sub question of how to avoid abuse possible to the lodgement of the immense number of appointments in the hands of the executive or how to give encouragement to the various government employes in order that they may strive for proficiency and rest their hopes of advancement upon the attributes of official merit good conduct and exemplary honesty and how best to avoid the evils creating a privileged class in the government service who in imitation of the European prototype may gradually lose all proficiency and value In the belief that they possess a life calling only to be taken away in case of some flagrant abuse

The thinking earnest men of the republican party have made no mere wordy demonstration upon this question but they have endeavored quietly to perform that which their opponents are inconsistently promising without performing Under republican rule the rest It has been that without engrafting any objectionable features of the European systems upon our own there has been a steady and even a rapid elevation of the civil service in all its departments until it can now be stated without fear of successful contradiction that the service is more just more efficient and purer in all its features than ever before since the establishment of our government and if defects still exist in our system the country can safely rely upon the republican party as the most efficient instrument for their removal

I am in favor of a high standard of excellence in the administration of the civil service and will lend my best efforts to accomplish a point of the greatest attainable perfection in this branch of our service

FOREIGN IMMIGRATION

Under our liberal institutions subjects and citizens of every nation have been welcomed to a home in our midst and in compliance with our laws to co-operate with our government While it is the policy of the republican party to encourage the oppressed of other nations and offer them facilities for becoming useful and intelligent citizens in the legal definite term the party has never contemplated the admission of a class of servile people who are not unable to comprehend our institutions but are indisposed to become a part of our national family or embrace any higher civilization than their own To admit such emigrants would only be to bring their own retarding elements into the very path of our progress Our legislation should be amply protective against this danger and if not sufficiently so now should be made so to the full extent allowed by our treaties with friendly powers

VARIOUS QUESTIONS

The republican party came into existence in a crusade against the democratic institutions of slavery and polygamy The first has been buried beneath the embers of civil war, but the party should continue its efforts until the remaining iniquity shall disappear from our civilization under the force of faithfully executed laws

There are subjects of importance which I would gladly touch upon did space permit I limit myself to saying that while there should be the most rigid economy in governmental administration there should be no self defeating parsimony either in our domestic or foreign service Official dishonesty should be promptly and relentlessly punished

Our obligations to the defenders of our country should never be forgotten and the liberal system of pensions provided by the republican party should not be imperilled by adverse legislation

The law establishing a labor bureau through which the interests of labor can be placed in an organized position I regard as a salutary measure The eight hour law should be enforced as rigidly as any others

We should increase our navy to a degree enabling us to amply protect our coast lines and our commerce and to give us a force in foreign waters which shall be a respectable and proper representative of a country like our own

The public lands belong to the people and should not be alienated from them but reserved for free homes for all desiring to possess them

And finally our present Indian policy should be continued and improved upon as our experience in its administration shall from time to time suggest

I have the honor to subscribe myself sir your obedient servant JOHN A LOGAN

To the Hon John B Henderson Chairman of the Committee

Our Candidates

Colonel John Hay

We have the same advantages in our candidates as in our record We support for the presidency a statesman who has for twenty years stood in the foremost rank of our public men and has filled the highest posts with singular ability and distinction the leader of his party in his state in both houses of congress in the cabinet of Garfield always sustaining himself by sheer merit and force of character and called at last from his retirement by the irresistible and almost unanimous voice of the republican masses acting without concert or organization determined for once to nominate a president for themselves We have placed on the ticket with him a veteran statesman and soldier also of the highest character and greatest experience We will say nothing about the democratic candidate for we know almost nothing to say He was a fair sheriff we hear he has not succeeded very well as a governor and I fancy we shall have no chance of discovering what sort of a president he would make His obscurity has gained him the sentimental attachment of a few erratic gentlemen for whom nothing that is known is good enough, and who want to think a president ought to be elected like the Grand Llama of Thibet A child four years of age is usually chosen for that lofty office probably to avoid any embarrassment as to his record Certain mystical feats and incantations are resorted to to ascertain if he is the true incarnation but it is understood that the emperor of China always works the oracle It is not the least of Mr Tilden's triumphs that he has been able to play so successfully in this comedy the part of the emperor

We have not gone either to the cradle or the grave for a candidate Our trusted loved and honored leader is a man in the full vigor of his years in the maturity of his splendid powers No one who knows him can dislike him and therefore he numbers his personal friends by the hundred thousand No public man who ever lived in America has had a more faithful and devoted following—not even the brilliant and gallant Clay And we are asked to believe a man like this is to be defeated because Mr Beecher says that scandals have been attached to his name and General Schurz does not think him an unselfish and patriotic American It will take more than this to undermine that robust reputation Twelve months hence many will be blushing for the slanders they are uttering now and admitting that we have a president of whom they are proud in James Gillespie Blaine

The attitude of *Puck* and two or three other eastern journals towards Blaine presents a funny contrast when contrasted with the position of the same journals three years ago In its issue of December 21 1881 *Puck* said If brains ever made a president of the United States brains will make Mr Blaine president He has set his heart on that dignity and nothing but death a miracle or a sunstroke will keep him from it Does *Puck* think a little tattooing will prove a more effective barrier than death to Blaine's ambition? It is not likely to do so as long as there is a suspicion abroad that the tattooing ink is paid for with British gold

INDEPENDENT CONFERENCE AT NEW YORK.

A Platform Adopted and an Executive Committee Appointed—The Prohibition Delegates all on the Ground

NEW YORK July 22.—A meeting of independents opposed to Blaine and Logan had been announced for to-day at the University Club theater in this city For an hour before the time fixed there was an unusual stir in that generally quiet locality and inside the corridors of the little theater a consultation of independents was busily carried on Among the more prominent faces noticeable were George William Curtis and Carl Schurz The latter was the center of interest of the animated group Clarence Bower of the independent and other members of the Brooklyn young republican club were present Secretaries made up a list of those who were to be present which shows that Massachusetts was more numerously represented than any other state except New York A few from New Jersey and Connecticut and some from more distant states were on the roll which at 11 o'clock was still incomplete

No resolutions have been agreed upon but it is understood that several platforms either in full or in part have been prepared These will be offered to the committee on resolutions and that committee will prepare a platform which the convention will debate and upon which it will act. The admission to the hall is by ticket but any one signing the following form furnished on printed slips to each applicant is given admission without question "Disapproving of the nominations by the republican national convention at Chicago as unworthy of support and believing the interests of good government and public morals demand the defeat of the republican candidates for president and vice president, and being, therefore resolved not to vote for Blaine and Logan I desire to take part with the other republican and independent voters in the conference to be held at University Club theater Madison avenue and Twenty sixth street New York Tuesday July 22 at 11 A M

CALLED TO ORDER.

George William Curtis called the meeting to order The attendance was largely made up of the delegates from Massachusetts Charles R Codman was elected president The list of vice presidents and enrollment committee was read including Carl Schurz General Barlow and C J Bonaparte of Maryland Nominees were all elected Colonel Codman made an address in which he said

You confer great honor on me in choosing me to preside over deliberations of not a body of officeholders but of citizens whose only desire is for the good of the whole country We have decided to cast aside party affiliations for the time being The nomination of the republican party for presidency is an insult to American manhood Blaine has not cleared his record from charges that he used his public office for private gain and we fear he will continue his usual methods and that he will prove no different in any enterprise he may embark in We make no charges against private character but Blaine is not fit to be president of the United States There is no great issue clearly defined between the two parties so that we have to confine ourselves to the question of fitness of candidates

The speaker was frequently applauded

VARIOUS SPEAKERS

In concluding his address Codman declared that the issues of the war were closed, and said We want men who are incorruptible and if they be able and energetic so much the better. He declared the present governor of the state of New York such a person

When Codman concluded Schurz moved that a committee be appointed to act on the resolutions and address carried

Theodore Lyman of Brookline Mass declared the people wanted an honorable and able man for the presidency He believed Grover Cleveland was such a person

Thomas Bacon of New Haven said the independent movement had grown to an enormous strength It had twice defeated Blaine in convention and hoped now to defeat him outside the convention

Colonel Thomas W Higginson said he had severed all allegiance for the time being to the party which he had helped to start owing to the character of the nominee this year presented

The committee on resolutions not being ready to report, recess was taken

THE CONFERENCE REASSEMBLES

When the conference assembled the secretary made a statement in regard to letters received by the New York committee from citizens in various states from Maine to California

Mr Quimby of New Jersey said that to save the republican party Blaine must be beaten, and that for every democrat in New Jersey who would vote for Blaine there were five republicans who would vote for Cleveland

... of Illinois said there was a very strong Cleveland element among the republicans in the west

President Seelye of Amherst said he was not prepared to join the democrats but was in favor of having a separate candidate He also made a plea for temperance in the platform

The committee on permanent organization recommended that a national committee should be appointed and the chair appointed the following

From New York—Carl Schurz Theodore Bacon John H Cowing Charles B Miller R R Bowker G W Folsom Allen Doty George Walton ... Deming

From Massachusetts—William B Forbes Joseph ... Josiah H Walter Samuel Hoar Phineas ... George V Leverett and Winslow Warren

From Connecticut—T E Baldwin O P Armstrong and H W Farnam

From New Jersey—Daniel Drake Smith Simon ... and W G Peckham

From Pennsylvania—F R Reeves Stewart Wood and Joseph Parrish

Chairman Codman and Mr Clrilin of Illinois were added to the committee

Carl Schurz in behalf of the committee on resolutions said there was no intent on to make a platform for a new party but only to appeal for pure government

George William Curtis read the address which is as follows

INDEPENDENT REPUBLICAN PLATFORM

The permanent issue of the presidential election of this year is moral rather than political It concerns national honor and character and honesty of administration rather than general policies of government upon which the platforms of the two parties do not essentially differ No position taken by one platform is seriously controverted by the other Both evidently contemplate a general agreement of public opinion upon subjects which have been long in controversy and indicate an unwillingness to declare upon other and cardinal questions, views on which in the present condition of opinion might seriously disturb the parties within themselves The parties indeed now cohere mainly by habit and tradition and since the great issues which have divided them have been largely settled the most vital political activity has been an endeavor of good citizens in both parties to adjust them to living issues and to make them effective agencies of political progress and reform The indispensable necessity of this course has long been apparent for in time of profound peace at home and abroad the most threatening national peril is insidious political corruption and a mercenary and demoralizing spirit and a tendency to that result that is well described by Senator Hoar of Massachusetts as the shameless doctrine that the true way by which power should be gained in the republic is to bribe people with offices created for their service and the true end for which it should be used when gained is in promoting selfish ambition and the gratification of personal revenge" But this doctrine has produced results which are still more alarming This spirit and tendency have so rapidly developed that they seek political power not only to gratify ambition and revenge but to promote gain.

WHY BLAINE IS OPPOSED

The platform then says, that the great party has habitually proclaimed it to be the duty of every citizen to support the party at elections without regard to the character of those whom it selects as its executive agents that the tendency of such policy is fatal to public welfare and that it is the duty of every patriotic citizen vital and imperative to baffle and defeat such demands. If the republican convention had presented a candidate whose character and career were the pledge of a resolute contest with the tendencies above described every republican voter would have gladly supported the nomination but the candidate has shown by his own words and acts of official record, that he is unworthy of respect and confidence that he has traded upon his official trust for his pecuniary gain and that he is a representative of men methods and conduct which public conscience condemns

THEY ARE ALSO DIVIDED

Upon practical questions of tariff and finance and other questions upon which both parties are divided within themselves we are also divided in opinion. We shall vote therefore in choice of representatives and other officers according to our individual opinions. As there is no distinctive issue upon public policy presented for the consideration of the country the character of the candidate becomes of the highest importance to all citizens who do not hold that party victory should be secured at any cost While the republican party presents a candidate whom we cannot support the democratic party presents one whose name is the synonym of political courage and honesty and administrative reform

The platform then eulogizes Cleveland at considerable length dwelling on his administrative ability and courage of conviction in the face of popular clamor as exhibited while mayor and governor It points out the fact that he has sprung into prominence since the war between the sections, and is not subject to the effect of fierce animosities in that line, and predicts that his administration would be to the honor of American citizenship at home and abroad

It then proceeds to declare that it is not the intention of its framers to leave the republican party or merge themselves in any other party, but that they propose to assist in defeating the republican nominees as a duty they owe the country as citizens in the interest of pure and wise administration They hold that the ballot is a trust, a responsibility which no good citizen should seek to set aside, and that he must answer to his private conscience for the right administration of that trust

The platform concludes by advising the independent voters to vote for electors who will vote for Grover Cleveland for president

THE CONFERENCE ADJOURNS.

Mr Curtis during the reading, was frequently interrupted by applause and when he had finished the resolutions were adopted without a dissenting vote

Mr Williams of Massachusetts, in a few remarks criticized the action of Governor Long of Massachusetts and Theodore Roosevelt of New York in endorsing Blaine after having denounced him in the convention and he denounced the rule of the convention which compelled the delegates to stand by the choice of the party

Mr William Everett of Massachusetts offered a resolution naming Cleveland and Hendricks as the nominees of the conference, which was laid on the table.

Soon after the conference adjourned on motion of Lyman of Massachusetts

After adjournment of the conference the national committee went into session, and discussed plans for permanent organization but no definite action was taken and the matter was referred to a subcommittee, consisting of Messrs Deming and Miller of New York and Pearse of Massachusetts to report a plan

It was also decided to have an executive committee of ten who shall have power to increase their number They will be appointed in a day or two.

Reports of general committees in various states were presented and it was thought that the most efficient work could be done in New York, New Jersey Connecticut and Massachusetts and strong efforts will be made to carry those states where state committees will be organized as also in Pennsylvania

The sentiment expressed shows that a majority of the members are in favor of conducting the campaign in an independent manner with occasional conferences with the democrats to avoid possible collision

Political Points

THE PROHIBITION NATIONAL CONVENTION

PITTSBURG July 22.—Prohibition delegates to the convention are nearly all on the ground The total number is about 400 The national committee met this afternoon and selected William Daniels of Baltimore for temporary chairman of the convention. It also adopted a resolution providing that all delegates be admitted to seats on the floor of the convention but that only those who have regularly signed credentials be permitted to vote The resolution will be approved by many delegates, and will cause an animated debate Daniels has drawn out of the contest for the presidential nomination, and the chances of Dr R McDonald of California and Stephen B Fisk of New Jersey instead of improving have materially weakened during the past twenty four hours, owing to the efforts of admirers of ex Governor St John His letter declining to accept the nomination which was mentioned last night, was addressed to T Edgar Hunt delegate at large from New Jersey as follows

NORTH HECTOR N Y, July 21

I am unconditionally for a third party, and shall heartily support the nominee of the Pittsburg convention but my work must be in the ranks with the people I want no office and could not accept any nomination All I want is a chance to fight liquor and all parties that are afraid to oppose it May God bless you and yours JOHN P ST JOHN

The friends of St John are urging his nomination and claim he will accept

The friends of St John are now claiming his election on the first ballot and assert that a careful canvass gives him 282 votes The national committee to-night appointed the following committee on credentials A J Judkins of Illinois, P W Nelson of Illinois G F Rogers of Connecticut J B Finch of Nebraska and S D Hastings of Missouri

HENDRICKS RECOMMENDED HIM

NEW YORK July 22 —Application for appointment to the board of police surgeons was made today by Dr Frank H Harrison who brought a personal letter from Thomas A Hendricks democratic candidate for vice president addressed to Mayor Edson and the police commissioners recommending the appointment on the ground that the applicant was a friend of the writer and a native of Indianapolis Mayor Edson transmitted the letter to the police commissioner and added that the applicant was a grandson of President Harrison Chief Clerk Hawley was instructed to reply that there was no vacancy at present

The regular shipment of beef cattle over the Northern Pacific from Montana points will commence in about two weeks From information received at the general freight department the shipments are expected to aggregate 75 000 head about twice the amount of last year's business

The efforts of the Northern Pacific company to protect its travelers from confidence men have apparently met with success There have been no complaints from passengers for several weeks and the sharpers at Heron and other towns have either been run out or made to desist.

The origin of the Billings fire is somewhat of a mystery Tinners were working on the roof during the day and by many the fire is supposed to have obtained its start from the charcoal fire used by them in soldering Others state their opinion that the fire was of incendiary origin

The severe thunder storm that passed over Helena on the afternoon of Friday concentrated its forces about five miles north of the town in the neighborhood of Mr Ewing's Goodwin's and Hard's, where the thunder and lightning was terrific One stroke of lightning killed a fine mare for Mr W H Ewing It hit her on the head and ran down the side to the hind leg singing the hair like a branding iron This mare was last able to make one mile in three minutes weighed 1400 pounds and was valued at $500 This is the second mare Mr Ewing has lost the present season

She Met Mrs. Christiancy's Betrayer.

New York Herald

Edelberto Giro who betrayed Mrs. Judge Christiancy now languishes in Ludlow Street jail Giro was arrested on Tuesday in a suit brought by Mrs. Caroline C Cox who is seeking to recover $11 583 which amount includes money and valuables alleged to have been obtained from her by false representations, the cost of an unused marriage outfit and $5000 damages for breach of promise of marriage Mrs Cox was at the beginning of the year Mrs Thompson of Bridgeport, and is said to be a cousin to P T Barnum and A S Hatch. About February 10 she saw the following advertisement

Refined, middle aged gentleman of position and means desires the acquaintance of refined handsome, middle-aged lady of means, view matrimony SINCERE, 140 Uptown

Mrs. Thompson sent her photograph to "Sincere" who turned out to be Giro, and came to New York. Giro told her he owned gold and silver mines in Mexico and other valuable property She says that in the latter part of February they became engaged to be married, and he induced her to invest about $8000 in one of his mines, borrowed $2000 worth of Kansas levee bonds and pawned her watch and chain for her for $60, and afterward borrowing $35 of the money for himself A little while afterward she says he induced her to invest about $300 in the 'Sitner Cyclone Company,' a dramatic organization which promptly came to grief. After the company's failure Giro behaved rudely and declared their engagement at an end She demanded her money but did not get it, and upon asking for her stock found that it had been deposited in a safe deposit company to her order, but was not to be given to her before the expiration of six months When Giro discovered that Mrs Thompson was making investigations, he apologized said he could not marry her, as he had wronged a young lady whom he would perhaps have to marry, and urged Mrs. Cox to be a friend On the 8th of last month Mrs. Thompson found a legal protector in her present husband Thomas J. Cox of Alabama. He did not know of her difficulty with Giro, but upon learning of it determined to have the matter sifted to the bottom, and the present suit was brought

LOGAN'S LETTER

As General Logan remarks in beginning his letter it is but a "party usage" of which he avails himself in writing a letter at all yet the party will be glad that there is such a usage, and that the candidate for the vice presidency has taken the occasion of accepting the nomination to say so many sensible things in discussing the platform

In his effort to be brief rather than to amplify, General Logan has hit the salient truths of the situation on some points quite as well as, if not better than Mr Blaine did, though Mr Blaine sacrificed everything to completeness Perhaps the grammarians may find some cause to complain of the letter though we find nothing that is not made clear as to meaning. Some of the sentences are wonderfully replete with both meaning and suggestion as when the writer says "We stand alone in our circumstances our forces, our possibilities and our aspirations" As a description of the country's resources, this strikes us as something quite as good as any of the grammarians can do It is a pleasant fact, and one worth calling attention to now and then, that there is hardly a legitimate necessity of civilized communities which cannot be produced from the extraordinary resources of our several states and territories, and it is a rather neat and forcible way of putting it, to say that our form of government is so entirely unique among the nations of the world as to make it "utterly absurd to institute comparisons between our own economic system and those of other governments and especially to attempt to borrow systems from them" There is the same tone of pride in our country and all that pertains to it which is so marked a feature in the Blaine letter.

Those who stated a few days ago that the letter would be mainly devoted to soldier interests guessed wide of the fact Logan is well enough known by the soldiers and ex soldiers to need no letters of promise from him to them as a class, and he finds four lines sufficient for the purpose in saying that the country should not forget its obligations to its defenders The country certainly will not forget these obligations so long as General Logan lives and those most concerned are perfectly well aware of this they have been given several unmistakable assurances, and they will do all in their power to keep Logan in the front, where his voice will carry force with it, as it did when he was at the front on horseback. There is no need to worry about the soldier vote. Logan owes his lasting renown to that one grand act of his life that placed him with the soldiers and eventually at the head of them They have kept him at the front ever since and always will. That one act which took him out of the democratic party and wiped out a record that was bad because it was of a piece with democracy was what may be said to account for the presence of his name on the ticket to-day It was prompted by the best impulse within him, and the better impulses have controlled him ever since, leading him through battles and onward to statesmanship that will compare favorably with any No ancient slaveowner would let the fact that Logan once favored the return of runaway negroes stand to his credit as against one hour of his fighting or one utterance since the war, and the political enemies who have been harping upon the old string are already retiring with the grammarians having found themselves among a generation familiar with Logan and his record, and quite satisfied with the acts of the one and the summing up of the other

The letter speaks out in favor of educating the masses. General Logan has long cherished plans for accomplishing general education more satisfactorily than has been possible in some of the states and favored, at one time the application of money collected in taxes on distilled liquors to this purpose He would even go so far as to provide work for his old enemies the grammarians

THE GOODY GOODS

George William Curtis and Carl Schurz met the other bolters from the republican party at the University Club theater in New York yesterday, and resolved that, since both parties are bad, they will support the worst They also resolved that the country should be run by its best men, and further resolved that they were the best men. They then generously proceeded to point out to the blind, bad deluded and otherwise incompetent people of the country (those not in the little University Club theater) that Cleveland should be made president The exact number present is not given, though it is fair to suppose that all the bolters were there notice having been given far and wide and invitations sent. There will be no riffraff to look after in this party, since all are leaders, and it will be no small part of the amusement afforded by the campaign to see them lead each other and command each other Captain Codman of Massachusetts can command awhile then General Schurz may step to the front, as this regiment of officers goes through the struggle, holding the democratic party up by the tail when it comes to the bad places, and trying to crowd the republicans off the sidewalk This meeting though unimportant, was really one of the the most interesting episodes of the political season thus far. The men who assembled there and resolved their wise little resolutions are noted for being very, very good They are known to be better than any other men in the country. In fact their superiority was their reason for meeting, and is their bond of union It is one of the glorious privileges of our country to thus meet and tell the poor scrubs outside, under the windows, what to do to be let in and sanctified.

W E. Curtis, now Washington correspondent of the Chicago *Inter-Ocean*, who has been made secretary to the commission to visit South America in the interests of our commercial relations has been managing editor of the *Inter Ocean* for several years, and first gained prominence by traveling through the south a dozen years ago or thereabouts, and writing accounts of southern outrages. Like Governor Pierce of Dakota, he used his newspaper opportunity to in every way and upon all occasions urge the renomination of President Arthur

---

Colonel John A. Martin, who was nominated for governor by the republicans of Kansas last week, is one of the best men of his State, and has for a number of years been an active republican and a member for Kansas of the republican national committee He was elected secretary of the committee at the last meeting attended by Chairman Jewell, and served until the late reorganization His nomination was the strongest one that could possibly have been made in Kansas He is a warm friend personally, as well as politically, of both Blaine and Logan.

The Mormons are said to be more impudent than ever, and are actively engaged spreading their power in Idaho, Wyoming and New Mexico Under such circumstances it is evident that the day of pretending to destroy this relic of barbarism by inserting an anti-polygamy plank in a political platform is past There should be acts that have a meaning, and there seems to be but one way to destroy it and that is for congress to abolish the present territorial organization and establish a new territorial government which will forever exclude polygamy.

The death of James Reilly of New York from the bite of a prairie rattlesnake has excited profound interest in medical scientific circles in that city. The main peculiarities of the case are, first, that a man whose business for twenty-five years has been the handling, "taming" and exhibiting of snakes should be bitten at all, and second, that the supposed infallible anti-

THE TARIFF QUESTION.

The Philadelphia *Times*, a protection organ whose editor was so alarmed at the election of Speaker Carlisle that he issued a call for General Grant "the man on horseback," to save the country, says that there can be no issue on the question of tariff agitation in this campaign because there is no conflict revealed between the republicans and the democrats in their platforms. "Both are directly pledged to revise the tariff and both are distinctly pledged to revise it on substantially the same basis The republican party pledges itself to correct the inequalities of the tariff and to reduce the surplus by such methods as will relieve the tax payer without injuring the laborer or the great productive interests of the country The democratic party is pledged to revise the tariff in a spirit of fairness to all interests and in such a way as not to injure any domestic industries" Free traders also practically stand up on the same platform Not long ago Charles Francis Adams Jr said that while he was in favor of free trade as an ultimate end no fair minded man could fail to recognize the fact that the government had invited the investment of a vast amount of capital in manufacturing enterprises, and that good faith required that no sudden change of policy should be made that would impair its value The protected interests according to his view have acquired something in the nature of vested rights which the government now must guard It appears, therefore that practically so far as the tariff is concerned both parties together with the reasonable free traders, are in favor of substantially the same thing No member of either party whose opinions are entitled to consideration, attempts to justify the monumental folly of taxing the people $100,000 000 a year in excess of the needs of the government But on the other hand all admit that the tariff should be reformed so as to reduce the surplus and without injury to laborers or the vested rights of capital

While there is nothing in the present attitude of political parties to disturb manufacturers, labor troubles continue and wages tend downward The wages of cotton operatives at Columbus, Ga have been reduced 10 per cent, and the men have accepted the change without preparing to resist by a strike The situation of the Ohio miners is becoming desperate and may yet result in outbreaks and bloodshed They are still out, and their places are being filled by Italians, imported for this purpose and offering a very cheap form of labor The great coal combination in Pennsylvania contemplates the suspension of operations during August, and possibly September and if this is done, the miners in that state, who have usually been the most unhappy, restless and miserable of all the laborers in this country, will become more restless and miserable According to the last census they receive on an average $325 a year They are not steadily employed because, if they were the consumers of coal would not be compelled to pay the producers so much for necessary fuel

We have no doubt as we have frequently said within the past few months that the combined producers of coal as well as the manufacturing generally are the chief beneficiaries of the protective tariff From the report to the census bureau by its special agent Mr Swank we learn that in 1880 the capital invested in the manufacture of Bessemer steel returned a profit of 67 per cent During the year 1870 in more than six hundred mechanical and manufacturing industries the excess of the product over the total cost of labor and material was $908 313 855, which was a profit of 45 7 per cent on the whole amount of capital invested The stimulus which production has given to manufactures has compelled sharp competition and this has enforced a reduction of wages The statistics of the iron trade show that in 1870 the average earnings of an iron worker were $523 per annum or a little over ten dollars a week In 1880 they had sunk to an average of $398 per annum or about seven dollars per week The employment of idle laborers in times of business depression is now one of the most difficult problems

The war tariff has been maintained up to the present time in spite of the efforts of both parties to reduce it by a combination of its natural enemies with its natural friends Prudhon has said that no one is less democratic than the people In the middle ages the people always sided against the barons and with the prince in a like manner now the people side with the capitalists from whom they receive their daily wages regarding them as benefactors, but complain of the extortions of merchants and market men, though the latter are compelled to sell high owing to the transportation and customs duties which the modern barons impose But at the present time both of the political parties have the support of many of the manufacturers in their laudable purpose to reduce the tariff taxes The manufacturers have been stifling each other with competition in the home market because of the stimulus to production which the tariff has given and living from hand to mouth where they were not actually falling behind battling all the time with their operatives over the question of a few cents more or less in the rate of wages The Manufacturers Tariff Reform League, which assembled in New York city a short time since, stated the needs of a large and increasing number of industries in these words

"The manufacturers of the United States are now in a position where they must command larger markets. The markets of the world alone are sufficient to give relief to their intensified means of production Glutted by overproduction and underconsumption, their narrow markets are now supplemented by the auction room and the sheriff's sale. All the high wages paid to our workmen, held up as a cause for leaving alone the existing tariff do not bring money into their pouches or bread into their baskets so long as they have no work to perform They will remain idle a large part of the year if they do not get free raw materials to work with Free raw materials give cheap subsidiary materials to all manufacturers and will open the world's trade to them make the United States the world's factory the ocean once more the highway of the United States and the stars and stripes swept by the breezes of all the seas of the world No grandiose statesmanship whose main policy consists in profligate squandering of an immense surplus wrung from overburdened taxpayers is required to obtain these ends, but a simple reform of our tariff a tariff based upon business principles, a tariff which in giving relief to the industries of the country, would likewise relieve the taxpayer from unnecessary burdens

Both the parties have failed—the republicans in the last congress and the democrats in this to make a satisfactory reduction of the tariff And we think that the Philadelphia *Times* is right in saying that no political party as a party can be trusted to adjust such delicate business problems as are mixed up in the tariff for the sufficient reason that it is not a political or a party matter It is purely a matter of business of calculation and study, and careful disinterested discrimination and we never shall or can obtain an equable satisfactory and successful tariff until we learn to separate this important subject from partisan discussion

The poor little town of Belknap has had nothing but bad luck since its founder, General Howell "went broke" and could not pay the men opening up a road to the Coeur d Alene mines It was the first boomed of all the rail road towns, and rushed itself forward to the dignity of a bank, several hotels a postoffice and hundreds of houses of which but five are now left This will probably 'knock out' the town and give all the eastern business of supplying the mines to Thompson's Falls six miles down the road from the burned town of Belknap This surviving town has displayed an amount of energy sufficient to found an empire, and is now waiting patiently to find out more particularly why it is there at all The mines are waiting for capital, and outside traders are waiting for the mines The claims now owned by men who can afford to work them are yielding plenty of gold, as appears from all accounts, but this kind of success does not make the demand for supplies that easy placer digging would have made, and the easy placer diggings were what Belknap and all the other places were making from impecunious prospectors and locators then the Portland merchants ought to have arrangements made to send in from the west all that is required. It will be a substantial trade by another year though so far as the business is concerned now the unfortunate town of Belknap will not be seriously missed by anybody except the unhappy adventurers who hoped to make their fortunes by building there

---

There is nothing in either party platform about the policy of running the Yellowstone National park yet it is clear that the conducting of this pleasure resort is one of the most perplexing questions of a purely national character now demanding attention The government's connection with it since its formal opening seems to consist mainly in giving somebody exclusive privileges and so many exclusive privileges have been given out that the privileged individuals are all the time quarreling in their efforts to grab all that can be grabbed Superintendent Conger is at outs with Assistant Superintendent Henderson and Manager Hobart is charged with making money by killing the park game and selling to the hotel Then Hobart turns on Conger with the charge of making money by letting out horses belonging to the improvement company The complication is so serious that it will call for an additional letter from each candidate if the United States persists in running a great national bear garden and letting out special privileges

The opposing views of prohibition are presented in the August number of the *North American Review*, by Neal Dow and Dio Lewis Anglo civilization says Dr Lewis staggers under strong drink " Although vices cannot be punished by law, which only reaches crime crimes play but a small part in demoralizing the race Gluttony injures the race more in a day than forgery in a century yet gluttony cannot be punished by law while forgery even though no harm results may be punished Legislation that ignores this distinction between vice and crime must prove a muddle and a failure We have made many laws against vices prescribing severe penalties We have repealed all these laws or allowed them to die and be forgotten, but no legislature has ever repealed a law against crime

CITY.

A COUNCILMAN.—A disgraceful affair in the committee room adjoining office yesterday. Major Sears late streets called at the auditor's office, very uncomplimentary remarks the city government calling it rotten, told him that one of the councilmen committee room adjoining and Major went in there and seated himself at Councilman Adams to whom he very impolite remarks calling him Mr Adams told Sears drunk and he would not pay to his remarks, but upon them ordered him to quit. Mr. Carry entered the room at this in hope of smoothing over matters that he would have to order if they did not stop quarrelling. Sears to strike Carry saying, I'll kill caught it on his arm. The of Adams the chair but the the blow. Sears then dropped the blow at Adams with his fist him and backed him up in a corner he was an old man and intoxi not strike him and thus ended the

BAR.—Recent soundings by the gov at Swan island bar show that an been maintained. There is only very short distance—near the Calculated at low water mark fourteen to fifteen feet. As there in the Willamette since the city operations, no additional deposit Consequently the city's able to maintain sufficient depth of coming low water season.

A meeting of young men evening in the parlor of the Y M considered "Is religion a real answered by a number of to be in charge of the

LEGIONARY CHINESE.—Over a thousand excited Chinamen were collected in and around the joss house on second street on Monday evening attracted by a rumor that there was danger of the establishment being leased for other purposes than a place of worship. The Joss House Association leased the ground on which the building and adjoining store stands and erected the buildings. The store was leased to Chune Yung, who sub-let it at an advance to Hop Chung. In order to get out of paying the advanced rate of rent Hop Chung repudiated the lease from Chune Yung and alleged that they had leased from the trustees of the Joss House Association. A lawsuit was the result and Hop Chung & Co were defeated in all the courts. They have paid the costs and now owe Chune Yung over $6000 back rent. A short time since Louis Park a member of Hop Chung & Co asked Leo Ty Hoo the agent of the Joss house association to let him see the lease the association had of the ground and he carried off the document and has not yet returned it. All demands for a restoration of the document he put off from day to day and at last said that lawyer Bingham had the lease and was gone to Walla Walla. So the joss house congregation which consists of every Chinaman who has not lost his queue, held a meeting to express their sentiments on the subject. The meeting was in favor of hanging Louis Park if as feared he should attempt to retain the association's lease of the land and try to let it and the building. It will not be safe for any one to attempt to lease the joss house as he will not only have a law suit on hand but will be likely to have the joss himself after him and all the Chinamen in the city.

SET BACK FOR GERDES.—There has been a change in the standing committees of the common council appointed last Saturday evening. Mayor Chapman since that time has placed Holland on the committee on streets and public property vice Gerdes and put Fliedner on the dredger committee vice Gerdes. Forbes was placed on the judiciary committee vice Holland. The three committees as now constituted are as follows: Streets and public property—Scogg, Adams and Holland; dredger—Holland, Andrus and Fliedner; judiciary—Adams, Forbes and Sears. This is about the toughest set back Gerdes ever received. It is known that he begged and pleaded and threatened in order to remain on the police committee but he had to surrender it and now that he has been rudely thrust from the other committees his heart will be broke entirely. However the taxpayers of Portland will probably view the matter more hopefully. They will take comfort in the thought that the city's interests will be guarded quite as zealously by Messrs Holland and Fliedner as they have been by the leader and spokesman of the free whisky gang.

CHICKEN THIEVES CAUGHT.—Early yesterday morning L. J. Carr of the Jefferson street ferry telephoned to the police office that two Chinamen were crossing the river to the east side and taking along a chicken coop and that they were the same parties who came across the river on Sunday morning with a lot of chickens supposed to belong to the lot stolen out near Mount Tabor. Policeman Elwanger immediately started on the trail disguised in an oil skin suit. He crossed the river and nearly two miles out met his victims who had been to their cache in the brush and filled their coops from the sacks of chickens there. Some parties residing near thought the Chinamen were thieves, but Elwanger spoke a good word for them and won their confidence. He followed them to this side, where he threw off his disguise and shouting to the terrified chicken stealers "I am Hawkshaw the detective" took them into custody. One of them gave the name of Ah Tom the other Ah Ot, so he can't amount to much. Ah Tom is an old hand at the business having been in the penitentiary for stealing chickens. The poultry of East Portland will not need to roost so high now.

ANOTHER SCHEME OF THE WHISKY CROWD.—It is rumored that a scheme is on foot to have a new city attorney appointed with the understanding that he is to appoint Messrs Coy Dabms and Drake his deputies. The sagacious Gerdes has the credit of concocting this scheme with the idea that the interests of the cheap whisky men will be subserved in the appealed cases now pending in the state circuit court. Drake having been their counsel in their crusade against law and order and high license. It is scarcely probable that such an arrangement will ever be consummated. The whisky men are all the time scheming and working to defeat the city but the city seems to take matters easy to say the least. City Attorney Dement should be home before long and the public will expect to have this whisky business settled up some time within the present century.

ARRESTED AFTER SIX MONTHS.—Scotty Clark, formerly a deck hand on the steamer City of Salem was arrested by Policeman Young last evening in Dorner's dive at the corner of Second and Yamhill streets on a charge of assault with attempt to kill. Clark was discharged from the City of Salem last winter and he imagined that John Vare the steward of the boat had something to do with the matter. About 3 A M on Christmas day Clark went on board the City of Salem and beat Vare in a brutal manner leaving him for dead. A warrant was issued for his arrest but he succeeded in escaping. A few days since he returned, when a warrant was issued for him. Young found him in the dive a place of resort for such men and arrested him. He fought like a tiger and Policeman Smith came to the assistance of Young and the two managed to get him to the jail.

WANTS HIS NAME CHANGED.—In the county court yesterday Counsellor William Foley presented a petition from his client one W P Smith a young physician asking that his name be changed from Smith to Agnew. The prayer sets forth that his name causes him a great inconvenience and embarrassment that Dr Smith by which he is known is very indefinite that his mail often gets into the hands of other men of the same name that he does not like the name of Smith and it is not a very euphonious name anyhow. He wants to take the name of Agnew out of respect to the noted physician who attended President Garfield. The court fixed September 1 as the date for passing sentence on the name of Smith.

SOLVED AT LAST.—It will be remembered that no satisfactory account has ever been given of the disappearance of Baker the one legged tramp who was tried, convicted and sentenced to death by a hastily organized court at Wallula junction. Very recently it has leaked out that he was shot and killed on the night after the trial that his body was carried across the Walla Walla river and that it was buried in a clump of willows about half a mile from the bridge. Who his executioners were only they themselves know.

NOT IN THE LIME COMPACT.—In Sunday's OREGONIAN it was inadvertently stated that the Tacoma Lime Company had been appointed agent for all the lime companies and had the entire control of that commodity here. The statement was incorrect as the Langdon brand of San Juan lime for which Taylor Young & Co are agents is not in the hands of the compact and is the only independent lime concern in Portland. The quality of this lime has been thoroughly tested and has proved to be unsurpassed.

ASSESSMENT OF MORTGAGES.—On the 1st of August the county clerk will, according to law place in the hands of the assessor a list of all unsatisfied mortgages recorded in his office. These will be assessed according to his returns. Holders of mortgages which have been paid in full or in part should have such payments recorded by the county clerk before the end of this month. This will save them a deal of trouble.

LATE IN BECOMING A CITIZEN.—Yesterday in the state circuit court Nicholas Garry Bird a resident of this county a native of Canada was admitted to citizenship. He took out his first papers in this city in March 1852 James Strong being court clerk at that time. Why he waited 32 years to become a full fledged citizen is not known but he probably wants to be in good readiness to vote for Blaine.

OVERLAND PASSENGERS.—Passed Heron yesterday to arrive here to day: J W Whalley and daughter, Paddy Hughes and wife, M Silverman, W J Umphrey, C G Wilson, David Wilson, J P Reynolds and wife, S T Jones, E S Akerman, Orville Wilson, J H May, D A J Lachman, M C George and family, L Parker, Meyer Rosenblatt and daughter, W M Pike.

BRIEF MENTION

The Ancon leaves Port Townsend Friday August 1 for Alaska.

Cole's circus Friday. Half price in the afternoon for everybody.

Arthur Kohn of Kohn & Steinbach has gone east on business and pleasure combined.

The dinner at hall of the W C T U will be given as usual this evening. Price 40 cents.

Chief Peo of the Umatillas passed through the city yesterday on route to Forest Grove to inspect the Indian school.

The next attraction at the Newmarket is the famous Ben Cotton in True Devotion. The season opens Monday the 28th.

Charlotte Thompson played the leading role of Helen in the Hunchback at Wallack's theater New York when but 14 years old.

The end of the salmon season is approaching and salt water fish are beginning to come in from the Sound. Smelt and rock cod were in market yesterday and formed an agreeable change from salmon straight. The opening of the railroad between here and Tacoma will considerably increase the sale of Sound fish here as heretofore they have arrived at a very unfavorable hour for dealers.

PERSONAL

Mr J W Whalley and daughter will return to day from their European tour.

Colonel Rodney Smith chief paymaster will be absent on months leave. With Mrs Smith he goes east Saturday.

Lieutenant Thomas W Symons formerly chief engineer of the department of the Columbia has been ceded to a captaincy of engineers.

President Harris of the Northern Pacific leaves this evening by special train on of the Oregon Railway and Navigation Company's Baker City branch.

Mr Thomas Gardner late of Portland and now manager of the Victoria *Daily Times* is in this city under treatment for a trouble with his eyes which keeps him confined to a darkened room.

Judge Miller and party arrived here yesterday. They will remain about a week and will visit the Sound before returning east. The party consists of the following ladies and gentlemen: Hon Samuel F Miller of the United States supreme court and wife, Miss Miller, Miss Corkhill, Hon William Mitchell, Hon [illegible], Hon G I Cole and Hon Greenleaf Clark, judges of the supreme court of Minnesota.

A CARD

Members and families of Order Knights of Pythias who are taking the excursion to San Francisco on the steamer leaving August are notified that party has been limited and the list will close at Thompson's book store Monday July at P M (positive). Parties can return, if they desire, by way of Victoria, Tacoma, Seattle to Portland. Full particulars at above place.

SALE STOPPED.—Just as the auction sale of lots in Kern's addition was about to commence yesterday afternoon some parties who had been making up a pool to take the whole of the remaining lots at a lump, signified their willingness to close the trade. The auction sale was therefore adjourned. The new owners of the property intend keeping it on the market, and those who were disappointed to-day will still have an opportunity to buy at auction figures.

RIVER IMPROVEMENTS THIS YEAR.

Further Details of what the U. S. Engineers will do in the Willamette and Columbia.

Just now there is not a busier suite of offices in the city than those occupied by the United States engineering department nor a more united force of workers than Captain Chas F Powel and his various assistants. The time is very short between the date of the government appropriation for river and harbor improvements becoming available and the date when work in order to be efficient and economical should be commenced. Hence no time can be lost in the matter of preparation. Yesterday Captain Powell kindly allowed a reporter of this paper to take up several minutes of his valuable time while he gave the following details relative to the plans outlined in Monday's OREGONIAN.

At the Cascades the minor rapids below the canal will be improved by taking out the rocks. All this is difficult submarine work, to execute which the government has an extensive plant. There will be excavations quarry drilling and stone cutting on some masonry structures accessory to the canal. The work will be done by hired labor under charge of Lieut Young. A large number of skilled mechanics employed on the work in former years have been waiting for some time in the hope of securing their old places. Most of them will be re-engaged. Operations will begin about the middle of August.

At Postoffice Bar the present revetment will be supplemented by means of spurs so as to reduce the curvature below the head of Sauvie's island. This revetment with the dyke across the head of Willamette slough is to be the permanent west bank of the river, the opening of 200 feet of course being maintained.

Pearcy's slough is to be further cut off from the Willamette by piling at the head of the slough.

For these two improvements on the Willamette there will be required 100 piles 20 feet long, 120 piles 31 feet long and piles 50 feet long, about 3400 cords young fir or willow for fascines, 600 cords of wood to supply steamers and 1,300 yards of rock.

It is thought that the present appropriation will hardly be large enough to complete the proposed improvements at St Helens bar but enough can probably be accomplished to avoid the necessity of sluicing or dredging next year. A large amount of piles fascines rock etc will be required for this work, specifications for which will be ready in a week.

Work on the Columbia river bar improvement is not likely to commence until next spring and will in all probability consist of a start on the great dike from Fort Stevens—the plan of improvement approved by a majority of the board of engineers. The appropriation will not carry it far enough to do much good but whatever is accomplished can be made permanent as far as it goes so that future work may be added to it until the desired end is accomplished.

The work of removing snags from the Cowlitz will probably be done by contract. In the Chehalis a party will be sent in small boats starting up from the Indian Reservation and working from boats and the shore to remove drift and snags. The government snag boat will be sent to the upper Willamette as soon as she can be got ready.

THE EAST SIDE.

ALLEGED LARCENY

Charles Walker was arraigned in Justice Coleman's court yesterday for stealing a pair of shoes valued at $3 from the complainant John Fisher. Fisher is a cousin of defendant residing on a farm about eight miles out on the Sandy road and alleged that defendant slept with him on the night of the 12th of July, and in the morning exchanged an old pair of boots for the shoes in question. The boots were produced in evidence, but the shoes could not be found. Two witnesses testified to seeing him wearing a pair of shoes—one the 13th, the other on the 14th—and the description given by these tallied with that given by the owner. Defendant made a statement denying that he had ever worn a pair of shoes of any description. The case was tried before a jury, W T Burney for the state and Wm Lock for the defense. After a half hour's deliberation the jury returned a verdict of not guilty.

NOTES

Marshal Linville was on duty yesterday though very weak from his recent sickness.

Hon A J Dufur and wife have gone east via the Northern Pacific for an extended trip. Their post office address for the present will be Chelsea Vt.

In respect to Flora Libert a friend of Captain Mooney who died in Portland of consumption aged 18 years the colors of company F were placed at half mast on Monday.

The city proposed to improve Maple street at the established grade but the railroad proposed to improve it at the old grade and so it is being improved at the old grade.

In the city attorney's report to the council Monday evening it did not appear that the old street committee had refused to advertise for bids after the contract for the elevated roadway on G street between Second and Water as required by the ordinance providing for the improvement of G street.

A belated and boozy Hibernian fell from an elevated roadway the other night and sustained a The water having just receded left the ground in a good condition for a man to fall on and he was agreeably disappointed. He had struck something soft and went home happy.

Each fire company of East Portland has been invited to join the State Firemen's Association and in the event of their acceptance it is probable East Portland will probably be selected as the place for holding the next annual tournament of the association. The matter will come up at the next regular meeting.

As a result of the many burglaries Sunday night the hammering down of windows could be heard in all directions the night following. Doors were locked that were never locked before, fire arms were loaded and kept in readiness for emergency, ladies secreted their valuables in slippers and other unusual places—and the city council raised the police force.

While Mr D Clayson of East Portland was returning from his farm in Clackamas county Tuesday evening he noticed two suspicious characters ahead of him this side of Milwaukie who as he approached secreted themselves in the brush from which they emerged after he had passed their hiding place about 300 yards. Their actions convinced him they were fugitives from justice but he had not at that time heard of the burglaries the night before or he might have bagged them. However if they were the parties who visited several of our citizens without invitation the latter can congratulate themselves they have left town.

CAKES WITHOUT EGGS.

In a little book just issued from the press of Messrs Scribner & Welford New York a large number of practical though novel receipts are given for making cakes of various kinds from the informal griddle cake to the stately bride cake without eggs, by the use of the Royal Baking Powder. Experienced housekeepers inform us that this custom has already obtained large precedence over old fashioned methods in economical kitchens and that the product is frequently superior to that where eggs are used and that less butter is also required for shortening purposes. The advantage is not alone in the saving effected but in the avoidance of the trouble attendant upon securing fresh eggs and the annoyance of an occasional cake spoiled by the accidental introduction of an egg that had reached a little too nearly the incubatory period. The Royal Baking Powder also invariably insures perfectly light sweet and handsome cake or when used for griddle cakes to be eaten hot enables their production in the shortest possible space of time and makes them most tender and delicious as well as entirely wholesome. There is no other preparation like it.

The President's Son Struck on the Charms of Miss McNulty

In er Mountain

It has just leaked out that Miss Jennie McNulty who recently played the part of Mercury in the comic opera of Orpheus and Eurydice in this city was the cause of an exciting episode while the company was playing in the town where President Arthur's son, better known as the Precious Thing, is going through a course of study. In plain English she run it a deliberate on him and demoralizing most on him. Jennie is an [illegible] girl with black lustrous eyes, alabaster complexion, graceful carriage. The Precious Thing almost went crazy over her and leaving college followed the troupe several hundred miles. Jennie became alarmed at this serious turn of affairs and pleaded with the adolescent and smitten creature to return to his studies. He positively refused. He wanted to marry the girl but the girl was not so inclined. Finally the president himself took a hand in the fight and he finally prevailed on his foolish progeny to go back to school and try and get over his incipient insanity. This is the romance of Jennie McNulty.

HOW CLEVELAND GOT IT.

The New York Machine Prostituted to Make him President—A Pretty Record for a Reform Governor

Buffalo *Commercial Advertiser* July 2: In 1882 you were a candidate for governor of the great state of New York. You were nominated as a reform candidate; your friends took special pains to impress upon independents and reformers that if elected practical politics and machine methods would find no place in your administration. In your letter of acceptance you indorsed what had been said in this respect in your behalf and over your own signature gave this guarantee as to what might be expected of you as governor.

Public officers are the servants and agents of the people and their duty is to execute the laws which the people have made and which within the limits of the constitution they have established. Hence the interference of officials of any degree whether state or federal for the purpose of controlling or thwarting the popular wish should not be tolerated.

This was a popular sentiment and won you many votes. Have you kept your pledges? Have you kept faith with those who supported you because of the excellent precepts you laid down? You are now a candidate for president of the United States. In order to forward your cause you have used or allowed to be used in your personal interest the entire civil service of the state greatly to the detriment of the public service; wherever an official was found that had any influence in his district he was set at work to elect Cleveland delegates to Saratoga. This prostitution of the public service was carried on openly and to an extent scarcely ever known before in this state. Your canal officials neglected their duty to work up caucuses and to manipulate conventions. For evidence of such neglect it is only necessary to point to the disastrous canal breaks that occurred this season. Your insurance officials, bank officials—in short the whole machinery of the state government have been employed in your political and personal service for weeks. Through its agency a more compact machine has been constructed in your interest than was ever seen in New York before. At this very moment this Cleveland political machinery is at Chicago booming your candidacy. A casual observer might suppose from the number of New York officials in that city that the headquarters of the state government had been transferred to the foot of Lake Michigan. Controller Chapin is here, Attorney General O'Brien is there, State Treasurer Maxwell and his deputy Eddie Apgar are there. So is John A. McCall insurance superintendent, James Shanahan superintendent of public works, O D Peck chief of the bureau of statistics and his deputy Hooley, W M Thayer prison labor commissioner, W C Hudson, clerk of railroad commissioners, together with an almost innumerable corps of minor officials all there shouting for you as the people's choice. As for the canals we doubt if a superintendent, assistant superintendent or section superintendent can be found in this state to-day. Hubert O Thompson, the disgraced commissioner of public works for New York city to save whose official head you vetoed on purely technical grounds one of the best reform measures presented to the last legislature, is there in your service. In 1883 the legislature passed a bill designed to take the civil service of the state out of the field of politics and to elevate its standard. You appointed a commission under that law to carry out its provisions. Augustus Schoonmaker of that commission is in attendance on the Chicago convention striving to influence the delegates in your behalf.

Now Mr Cleveland the public of this state would like to know how you harmonize your very excellent pre-election reform precepts with your post election ultra machine practice.

VIGOR [illegible]

Brooklyn's Great Chemist.

"This is to certify that I have made a careful analysis of **DR. PRICE'S CREAM BAKING POWDER** and also of the Royal Baking Powder.

"I find that **DR. PRICE'S POWDER** is made of pure materials and mixed in the best chemical proportions for the objects to be attained."

"It contains no Carbonate of Ammonia, but one-half as much starch as the Royal Baking Powder, evolves more carbonic acid gas, both by analysis and by a practical test in the preparation and baking of biscuits, makes a lighter, better flavored, and in my opinion, more wholesome article of food."

"I regard the **PRICE BAKING POWDER** as superior to the Royal Baking Powder for the following reasons:

1. It contains no Ammonia, a substance which is not advisable in articles of food and unnecessary, if it is not positively injurious.
2. It contains less starch and, therefore, weight for weight, contains more of the active ingredients and is a purer article.
3. It evolves more carbonic acid gas and therefore more efficient, as shown by analysis and by experiment with a weighed quantity of biscuit dough.
4. The ingredients are mixed in better proportions, so that there is less free alkaline carbonate remaining in the dough to impair digestion by neutralizing the gastric juice.
5. It gives a lighter and better flavored dough owing to the facts stated in Nos. 3 and 4 above."

"I know of no respect, in which **DR. PRICE'S CREAM BAKING POWDER** is inferior to the Royal Baking Powder.

I am very respectfully yours, ELIAS H. BARTLEY, B. S., M. D.

IMPROVEMENT OF TIDE-LANDS.

WARRENSBURG, Clatsop Co., July 18, 1884.

To the Editor of The Oregonian:

The improvement of the tide-lands around the mouth of the Columbia river, by diking, is receiving marked attention since it was put to a practical test about five years ago, by the construction of nearly two miles of dike, thereby reclaiming 325 acres of land.

I have been over this tract several times since the dike was built, and have witnessed from time to time the wonderful effects of cultivation upon this tide-land soil, and have become so thoroughly convinced that in these lands there lies, undeveloped, such a vast amount of agricultural wealth, that the thought came to me of giving to your numerous readers, particularly to those now seeking homes in this great northwest a general idea of the methods employed, and the results thus far reached, in this new and promising enterprise.

Through the courtesy of the Hon. D. K. Warren I have been allowed to use his notes, on file, in answer to inquiries made by the commissioner of agriculture. The information given, therefore, will be such as has been gained by an observation of over thirty years in this vicinity and a practical experience of five years in reclaiming such lands. And it is but just to say that but for the eminent practical ability and indefatigable energy of Mr. Warren, the tide lands near the mouth of the Columbia would be in about the same condition to-day, as when that noble old river

"Heard no sound save her own dashings."

As I sit looking out upon a tract of over 300 acres of smiling meadows, luxuriant fields of grain and vegetables, and peaceful flocks and herds quietly grazing in rich pastures, I think of the same area only five years ago, periodically covered with water to the depth of from one to three feet, having the appearance of a great gulf or bay; and the pictures thus presented are so in contrast as to be simply marvelous.

CHARACTER OF THE LANDS.

Tide lands in this vicinity may be divided into two general classes in respect to the character of the soil.

First—Those which border on rivers, small streams and bays.

Second—Those which lie farther in and adjacent to the high lands, and around the heads of tide sloughs.

The first class consists of a stiff muck formed by the sediment and "wash" of rivers, and augmented annually by the decomposition of vegetable matter which grows upon the soil. It contains, also, a small percentage of sand, forming altogether what is generally known as clay lands.

This surface deposit is from three to four feet in depth, and rests upon a sub-soil of slate-colored clay of a depth not accurately determined.

The second class is commonly called "beaver-dam," and composed entirely of decomposed vegetable matter, or peat.

These tide lands have an average elevation of about one foot above ordinary high tide, the mean rise of which is about six and one-half feet. This rise is sometimes increased by southerly winter storms from four to four and one-half feet, or more than three feet above the surface of the land.

CONSTRUCTION OF DIKES.

The first dikes built by Mr. Warren are ten feet on the base, the sides sloping up at an angle of about forty-five degrees, until a hight of five feet is reached, leaving the top about four feet in width. They are constructed from materials adjacent. A ditch is cut on each side, and at a distance of about two feet from the base of the dike, and of sufficient width and depth to furnish the requisite amount of material. It is found to be unnecessary to remove the turf from the surface on which the dike is constructed.

One peculiarity of the tide lands, and one which at first seemed to present a serious obstacle in the way of success, is that numerous

SLOUGHS OR TIDE STREAMS

cross the surface, some of which are wide and deep. These require strong dams in order to resist the greater pressure arising from the increased depth of water at these points. The dike of which we are speaking covers ten of these streams, varying in width from twenty to one hundred feet, and of an average depth of eight feet. After some experimenting it was found that these dams were best constructed of the same material, with the addition of sufficient brush to bind the mass together. No planks or piles are necessary: in fact, they would be a useless expenditure of time and money. The base of these dams are about forty-five feet wide in the bed of the streams and twenty feet at the surface. Upon this as a foundation is constructed the dike as before described.

TIDE GATES.

In or adjacent to the large sloughs are placed boxes or sluice-ways and tide gates. These boxes are constructed of plank eighteen inches wide and three inches thick. The bottom being two of these planks in width, resting on and securely spiked to cross-timbers well bedded. One plank set up edgewise for each side, and the top covered with the same material, cut and laid crosswise to the structure; the whole being well spiked together and placed from five to seven feet below the surface.

At the outer end of each box is the gate, which is hung at the top with wooden hinges placed about three feet above the box, and holding it in a vertical position, so that when the tide comes in the gate is forced against the end of the box, closing it firmly, and preventing the water from passing through. If by accident or otherwise a break should occur in the dike, allowing any considerable amount of water to overflow, these gates would allow it to run out freely at low tide, thus causing very little damage, as the break could be repaired before the next high tide.

COST OF CONSTRUCTION.

The average cost of constructing dikes similar to those under consideration, reckoning wages at $2 per day, is about $2 per rod, with an additional expense of 25 cents per cubic yard for filling the sloughs.

The cost per acre for reclaiming the lands in this vicinity is from five to ten dollars, when reclaimed in tracts of from five hundred to several thousand acres and the expense of keeping the two miles of dike now built has not thus far exceeded $5 per annum, and this expense has been principally on account of the burrowing of muskrats, from which, however, very little trouble is anticipated.

We have thus far spoken only of dikes through the first class of lands. The cost of building and maintaining dikes through the beaver dam or peat lands would be considerably greater, since the surface material is of a light, porous nature which contracts and settles by the process of decomposition. But it is seldom necessary to construct dikes through this class of lands, since the location, as heretofore described renders it unnecessary to build through them; the heavier or clay soil being invariably found along the front or shore lines of the bays and rivers.

Mr D. K. Warren, in company with his brother, P. C. Warren, are now constructing a dike which will reclaim, when completed, a tract of over 400 acres, lying adjacent to the tract already described. This dike is fourteen feet wide on the base, and built up semi-cylindrical in form. It is expected that several others adjoining will soon commence building from each end of this, making a continuous dike, when finished, of nearly five miles, and reclaiming over 4000 acres of land.

CULTIVATION OF RECLAIMED LANDS.

The method of cultivating reclaimed tide lands is similar to that of prairie lands, with perhaps this single exception: That while the prairies of the west are usually broken during the early summer months, these lands may be broken at any season of the year.

Mr. Warren's method is to sow oats on all that is broken in winter, and in spring prior to June 1. After harvest the land is cross-plowed and then seeded with timothy or clover, which insures a crop of from two to three tons of good hay to the acre, and subsequently it will produce from three to five tons at one cutting, continuously, for many years, besides furnishing fall pasture of sufficient value to pay all the expenses of harvesting the hay.

When reclaimed these lands are well adapted to all kinds of cereals, vegetables, grasses and fruits which can be cultivated anywhere in this latitude or climate, and they are unsurpassed in point of fertility; while the contrast between them and the uplands for general farming, gardening or grazing is almost as marked as it is between the beautiful valley of the Genesee, in New York, and the sandy sage plains of Colorado. There are hundreds of thousands of acres near the mouth of the Columbia and along the bays and inlets of the coast, both north and south, awaiting cultivation.

WHY SO LONG NEGLECTED.

In this vicinity thousands of acres of tide-lands have been owned and occupied by the pioneers of Oregon for more than thirty years, and yet, until five years ago, as I have already said, there was not fifty acres of reclaimed land anywhere on the Columbia.

Why? The principal reason is, that it requires both time and capital to insure success; and few are willing and many unable to expend the necessary amount and await returns. To illustrate: A owns 200 acres which he desires to reclaim; B owns the same amount, but has not the means to join A. C has an adjoining tract, but has no faith in the enterprise. Now in all probability these several parcels of land are so situated that the whole can be reclaimed at about the same expense as either part, and C, who refuses to dike, refuses also to sell, and there is no law which will compel him to pay his proportion of the expense or even grant a right of way across his premises.

But "nothing is so successful as success." The experiments of the last few years have demonstrated beyond the shadow of a doubt the practicability of diking. The "Rip Van Winkles" are waking up; companies are being formed; individuals are actively at work, and it is hardly possible to predict the grand results which will be achieved during the next decade.

R. K. WARREN.

A Souvenir from the King of Siam.

Before the Siamese embassy sailed from this country to England a pleasing episode took place at New York in its presence, which was alike agreeable to the parties immediately concerned and the limited number of spectators present. Some time ago P. G. Sanford, as the agent of a rifle manufacturing company, sold to the Siamese government a number of repeating rifles, with which the king was so well pleased that he entrusted to our Siamese consul, Torrey—who is now home on a leave of absence—the decoration of the "Golden Flower" (Puspa Mala), to be delivered into the hands of Mr. Sanford, which office was duly performed, as has been stated. The document containing the offer of the decoration was enclosed in a large white envelope and accompanied by a gold medal, which was pinned to Mr. Sanford's breast by Consul Torrey. Before taking their departure from the United States the members of the Siamese embassy expressed themselves as well pleased with their entertainment, our country and our people.

Colonel Gilbert A. Pierce, the newly appointed governor of Dakota, has cherished a desire for that particular office since 1881. At that time he mentioned incidentally that in the capacity of governor of Dakota a man had an immense field to turn around in, and ought to gather sufficient momentum to land himself in the United States senate. Some interested friends will now watch "Gil's" efforts to condense steam and smile at the *News* balancing on the safety valve.

The other day Mrs. Scoville, now known as Mrs Howe, the sister of the late Charles Guiteau, stated that her former husband was about to marry again, and that she had a lot of wedding stationery that they had not used, and which she proposed to send him, from good and generous spirit, to facilitate matters on the occasion.

"I am a merchant and planter," writes Mr. T. N. Humphrey of Tennessee, "and it gives me great pleasure to say that for severe coughs and colds Allen's Lung Balsam is the best remedy now offered for sale. I have induced many to try it with the best

TRADE AND COMMERCE.

TUESDAY, July 22.

Cloudy but warmer weather obtains the entire length of the valley to-day. In the eastern section rain fell last night at Riparia and Dayton. At other points the sky is overcast, but the temperature ranges from 64 to 73.

Overland receipts include 20 tcs hams, 25 bxs soap, 100 cs canned goods, 15 cs bacon, 10 hf lard, 5 bbls baking powder, 2 cs cigarettes, 157 pkgs tobacco, 100 bbls beer, 40 bxs 250 kgs nails.

PRODUCE RECEIPTS—Past 24 hours: 354 bbls flour, 440 ctls oats, 208 ctls bran, 21 sks potatoes, 6985 lbs wool, 150 lbs hides, 55 cs eggs, 2 pkgs butter. Also, 2057 ctls wheat, 798 bbls flour, 242 ctls bran, 68,945 lbs wool, 343 lbs hides, from the eastern section.

FREIGHTS—The market exhibits only a steady tone in the absence of business. The two wooden vessels in port are not being forced and shippers are backward. In futures there is little interest manifested. The prevailing uncertainty no doubt prevents the heading of more tonnage this way, as offers of vessels have been made at rates above the views of shippers.

WHEAT—All reported markets are quiet but steady, with the exception of Chicago, which is off one cent. With us the same inactive condition is continued. The receipt of two lots from the upper Columbia is noted, one on old purchase account and the other on consignment.

OATS—Good feed sold down to 46 cents, and this is about the top of the market. Values appear to be steadily declining under free offerings and nearness of new crop.

POTATOES—Receipts less, but stocks and offerings are fully equal to the request. Dealers continue to pay 75 cents per cental for lots of good.

HAY—The possibility of damage by rains has caused some holders to ask up, but dealers were not pressed to buy and no advance is established. Quote good timothy at $10@12.

MILLSTUFF—Bran in large receipt but some of it goes forward to San Francisco. Jobbing values steady and unchanged.

DRIED FRUIT—We quote: Sun dried apples 9@10c, factory in boxes 15@16c, eastern in barrels 9½c, pears in boxes 15c, sun dried plums 13@15c, boxes 16c, peaches 12@14c, prunes 8@12c, figs 9c, raisins $1 75@2 per box.

BUTTER—Ordinary local brings 20c and dairy 21@25c. No imported of consequence now being offered.

CHICKENS—Not so firm and old sold off to $5 as top figures. Young bring $3@3 50. Market weaker with supplies showing some increase.

EGGS—Steady at 30 cents.

SALMON—The following from Sunday's *Astorian* will interest those who have wagered new hats on a short pack: History is said to be precept teaching by example. If this is so, the probable outcome of the business so far as salmon fishing on the Columbia river is concerned, will probably be this—no more fishing in April, and not much in May. Last year fish were seventy-five and ninety cents all through the season, and at this price canners packed half a million cases. Then came the glut in July, boats coming in loaded down with salmon that went begging at two bits apiece, and canners who had filled their cans with high priced fish stood and saw fish equally as good thrown away because there was not capacity enough in the canneries to get away with them as fast as they came. The beach from Alderbrook to Uniontown was lined with the festering carcasses of the finest Chinook salmon, from which the bellies had been cut, and any man could have all he wanted for the asking.

This year brings the same state of affairs. The chief difference is that the cannery supplies are not quite as plenty as they were in 1883.

In April very little fishing was done. The Cutting and one or two other companies packed through April; the great majority of the canneries did nothing till May. The May run was a little below the average; the June run about equal to that of last, but about the 5th inst. came a rush from the sea that taxed the utmost capacity of the fishermen to catch and the canners to prepare. During the last week the fish have come in incredible quantities, and the price has dropped to four bits and even less. Some of the canneries will shut down to-morrow, more on Wednesday, several more on Thursday, and the close of this week will see few of the thirty-eight putting up any salmon. As to the future, the oldest and most experienced in the business say: "We don't know."

THE CONDITION OF CROPS.

The condition of the crops both at home and abroad is a subject of vital importance at the present juncture to commercial men, and the future course of events depends much upon the outcome of the next six weeks or two months. The latest advices from Europe have not been so favorable as last week, stormy weather having done much damage in England and on the continent, particularly in Hungary and Russia, while India has been suffering from a severe drouth. In marked contrast to this condition of affairs abroad our own crop prospects seem to grow better week by week, and have reached a point that promises a yield beyond precedent. The weather for the past ten days has been very favorable in Minnesota and Dakota for winter wheat, and in many localities heavy yields of rye and barley are almost assured. The important crop of spring wheat in Dakota looks very promising. It has very generally passed the danger from drouth by which it was threatened toward the end of last month, and the existing cool weather is just what the grain requires as it enters upon the milky stage of its growth, which is always a most critical period. The harvest of all the cereals in the enormous area in question will be from a week to ten days earlier this season than is usual. According to reports received by the agricultural department of the state of Illinois the corn crop is generally in a good state of cultivation and the stand is above an average. There has, probably, never been a better prospect for corn than is now seen. The condition of the northern division of the state gives encouragement for an average yield per acre. The condition promises 20 per cent. larger yield than last year at corresponding date and 86 per cent. larger yield than in July, 1882. The area of corn in the northern counties is 2 per cent. less than last season. The area is larger than in 1883 in the following northern counties: Iroquois, Knox, Mercer, Peoria, Putnam and Warren. The prospects are encouraging for nearly an average yield of corn in the central counties, which include what is generally known as the corn belt of the state. The condition has been improving since the reports were received at the department of agriculture, and an average or better yield per acre is assured in the majority of the largest corn counties in the state. Michigan promises nearly 22,000,000 bushels of wheat, which is 1,512,641 bushels less than 1883, but this arises from decreased acreage. The July estimates from Ohio place the yield of that state at 35,000,000 bushels wheat against 26,000,000 last year. The condition of the cotton crop is still favorable for an increased yield as compared with last year. At present the indications point to a yield that will give us a large surplus of cereals and cotton for marketing abroad, and this surplus will find a ready market in consequence of the reduced yield of the great wheat growing sections of Europe.—*New York Shipping List.*

SHIPPING NOTES.

The Columbia sails from San Francisco to-morrow.

The State of California sails hence Friday night.

High tides at Astoria to-morrow at 12:31 A. M. and 2:14 P. M.

In the fiscal year ending June 30, 1884, the keeper of the light station at Cape Flattery reports a total of 1877 vessels passing that station. The total is made up of 278 ships, 601 barks, 23 brigs, 444 schooners, 9 sloops and 522 steamers.

The bark Nuevelink is now 55 days out from Hong Kong for this port, and is daily expected. She brings about 20,000 mats rice as bulk of cargo. The Kirkwood, in coal from Sydney, is now 31 days out from 35 N. She has evidently met calms. The Largo Law, from Hull, is 113 days out with a cargo of coal. Of the six vessels now en route from Liverpool, the smart ship Grisedale leads in 104 days, and the next few days may see her off the river. The Alphota is 115 days out from London, and should soon report herself. From Glasgow the well known City of York is out 102 days. These are the leading vessels now headed this way, and the only ones expected in the next thirty days, as it is not expected that any of the Troop barks from Rio will report in that time.

WOMAN'S SUFFERING AND RELIEF.

Those languid, tiresome sensations, causing you to feel scarcely able to be on your feet; that constant drain that is taking from your system all its former elasticity; driving the bloom from your cheeks; that continual strain upon your vital forces, rendering you irritable and fretful, can easily be removed by the use of that marvelous remedy, Hop Bitters. Irregularities and obstructions of your system are relieved at once, while the special causes of periodical pain are permanently removed. None receive so much benefit and none are so profoundly grateful and show such an interest in recommending Hop Bitters as women.

A Postal Card Story.

I was affected with kidney and urinary Trouble—

"For twelve years!"

After trying all the doctors and patent medicines I could hear of, I used two bottles of Hop

"Bitters;"

And I am perfectly cured. I keep it

"All the time!" Respectfully, B. F. Booth, Saulsbury, Tenn.—May 4, 1883.

BRADFORD, PA., May 8, 1875.

It has cured me of several diseases, such as nervousness, sickness at the stomach, monthly troubles, etc. I have not seen a sick day in a year, since I took Hop Bitters. All my neighbors use them.

MRS. FANNIE GREEN.

$3000 Lost.

"A tour to Europe that cost me $3000 done me less good than one bottle of Hop Bitters; they also cured my wife of fifteen years' nervous weakness, sleeplessness and dyspepsia."

R. M. AUBURN, New York.

SOUTH BLOOMINGTON, O., May 1, 1879.

Sirs—I have been suffering ten years, and I tried your Hop Bitters, and it done me more good than all the doctors.

MISS S. S. BOONE.

Baby Saved.

We are so thankful to say that our nursing baby was permanently cured of a dangerous and protracted constipation and irregularity of the bowels by the use of Hop Bitters by its mother, which at the same time restored her to perfect health and strength.

The Parents, Rochester, N. Y.

Pretty Woman's Secret.

Fear of discovery, when she resorts to false hair and dyes, is a source of constant anxiety to her. The very persons from whom she most desires to hide the waning of her charms are the ones most likely to make the discovery. But there is no reason why she should not regain and retain all the beauty of hair that was her pride in youth. Let her use AYER'S HAIR VIGOR, and, not only will her hair cease to fall out, but a new growth will appear where the scalp has been denuded; and locks that are turning gray, or have actually grown white, will return to their pristine freshness and brilliance of color. AYER'S HAIR VIGOR cures

Hereditary Baldness.

GEORGE MAYER, *Flatonia, Texas*, was bald at 23 years of age, as his ancestors had been for several generations. One bottle of HAIR VIGOR started a growth of soft, downy hair all over his scalp, which soon became thick, long, and vigorous.

Ayer's Hair Vigor

is not a dye, but by healthful stimulation of the roots and color glands, speedily restores to its original color hair that is

Turning Gray.

MRS. CATHERINE DEAMER, *Point of Rocks, Md.*, had her hair suddenly blanched by fright, during the late civil war. AYER'S HAIR VIGOR restored it to its natural color, and made it softer, glossier, and more abundant than it had been before.

Scalp Diseases

Which cause dryness, brittleness, and falling of the hair, dandruff, itching, and annoying sores, are all quickly cured by AYER'S HAIR VIGOR. It cured HERBERT BOYD, *Minneapolis, Minn.*, of intolerable **Itching of the Scalp**; J. N. CARTER, JR., *Occoquan, Va.*, of **Scald Head**; MRS. D. V. S. LOVELACE, *Lovelaceville, Ky.*, of **Tetter Sores**; MISS BESSIE H. BEDLOE, *Burlington, Vt.*, of **Scalp Disease and Dandruff**. Torpidity of the roots of the hair, which, if neglected, may result in incurable baldness, is readily cured by AYER'S HAIR VIGOR. As

A Toilet Luxury

AYER'S HAIR VIGOR has no equal. It is colorless, cleanly, delightfully perfumed, and has the effect of making the hair soft, pliant, and glossy.

DR. PAUL M. BRENAN

IS THE MOST SUCCESSFUL PHYSICIAN ON the Pacific coast in the treatment of all Chronic and Difficult Diseases of the Sexual Organs.

He will guarantee to cure any form of disease of the generative organs or private disease, if the patient follows his advice and treatment.

He has become an expert in the treatment of diseases, weakness and derangements of the reproductive organs of both male and female, including diseases caused by the FOLLIES OF YOUTH, such as Spermatorrhea, or Seminal Weakness, or Loss of Perfect Vitality. Nearly two-thirds of all the chronic diseases spring either directly or indirectly from some derangement of the sexual system, and yet this subject is neglected by a majority of the Medical Profession.

Persons afflicted by any form of sexual disease or weakness often delay in calling upon the proper physician to thus, from a sense of modesty and sometimes from ignorance, and permit these diseases to exist, until their constitution becomes corrupted, their organization broken down, and the hope of future happiness blighted, until death becomes a welcome messenger to carry them out of their miserable existence. Everything strictly confidential under all circumstances. Lost manhood perfectly restored.

Catarrh, Bronchitis, Throat Disease, Skin Diseases, Rheumatism, Kidney Complaint and all diseases of the Eye and Ear, Stomach and Bladder, he can cure without fail, if they are curable, and if not, he will tell you so.

Consultation Free, and a list of printed questions sent to those living at a distance who cannot consult him personally. Enclose postage stamp for list.

Office—Nos. 132 and 134 Third street, corner of Alder, opposite Masonic Hall.

Office Hours—10 to 12 A. M., 2 to 5 and 7 to 9 P. M.

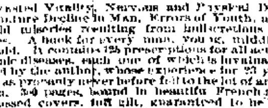
THE SCIENCE OF LIFE, ONLY $1

BY MAIL POST-PAID.



KNOW THYSELF.

A Great Medical Work on Manhood.

Exhausted Vitality, Nervous and Physical Debility, Premature Decline in Man, Errors of Youth, and the untold miseries resulting from indiscretions or excesses. A book for every man, young, middle-aged and old. It contains 125 prescriptions for all acute and chronic diseases, each one of which is invaluable—so found by the author, whose experience for 23 years is such as probably never before fell to the lot of any physician. 300 pages, bound in beautiful French muslin, embossed covers, full gilt, guaranteed to be a finer work, in every sense—mechanical, literary and professional—than any other work sold in this country for $2 50, or the money will be refunded in every instance. Price only $1 00 by mail, post-paid. Illustrative sample six cents. Send now. Gold medal awarded the author by the National Medical Association, to the officers of which he refers.

THE SCIENCE OF LIFE should be read by the young for instruction, and by the afflicted for relief. It will benefit all.—London Lancet.

There is no member of society to whom THE SCIENCE OF LIFE will not be useful, whether youth, parent, guardian, instructor or clergyman.—Argonaut.

Address the Peabody Medical Institute, or Dr. W. H. Parker, No. 4 Bulfinch street, Boston, Mass., who may be consulted on all diseases requiring skill and experience. Chronic and obstinate diseases that have baffled the skill of all other physicians a specialty. Such treated successfully without an instance of failure. Mention this paper.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette.

WOLFE'S

Schiedam Aromatic Schnapps.

As a general beverage, necessary corrective of water rendered impure by vegetable decomposition or other causes, as limestone, sulphate of copper, etc., the AROMATIC SCHNAPPS is superior to every other alcoholic preparation. A public trial of over thirty years' duration, in every section of our country, of UDOLPHO WOLFE'S SCHNAPPS, its unsolicited indorsement by the medical faculty, and a sale unequaled by any other alcoholic distillation, have insured for it the reputation for salubrity claimed for it. For sale by all druggists and grocers.
